Chem 152 Lab
Prelab Assignment for week 8, the midterm exam.

For the practical, you will be asked to use the skills you have been developing over the course of the semester.

There is NO computer graded pre-lab for the practical.

For this prelab assignment you are to write an appropriate introduction for your experiment following the format used for a report. This is to be your FINAL introduction for the report. You will not be allowed to modify it after the deadline. This is the only graded pre-lab activity. The grade you receive will NOT be a TAG grade but instead will be included as part of the report grade. You are to submit your introduction to the “Practical midterm TAG” folder of the D2L dropbox.

In addition you need to prepare an outline of the various things you will have to do when you enter the lab. Put this outline in your notebook. This will not be graded. Rather, it will help you make the most of the limited time you will have available in lab to perform the experiment.
